

Mr. Jonathan Mark Webb **Consultant Orthopaedic Surgeon**

Background

Mr Webb is a Consultant Orthopaedic Surgeon who specialises in knee surgery and Sports Medicine. He has a particular interest in arthroscopic (keyhole) surgery and reconstruction of knee ligament injuries.

Mr Webb has had a broad training in Orthopaedic and Trauma surgery in Bristol, Oxford and Sydney.

He has been awarded the Certificate of Completion of Specialist Training and is therefore privileged to be listed in the Specialist Register of the General Medical Council. He undertook a Fellowship at the North Sydney Orthopaedic & Sports Medicine Centre in Australia. This is a prestigious unit treating National and International athletes from the whole of Australia as well as providing the medical staff in charge of running the Sydney 2000 Olympics. During this time he was trained in the latest techniques of arthroscopic day stay surgery, which result in rapid patient recovery and subsequent rehabilitation.

In 1997 he was awarded a Research Fellowship by the British Association of Surgery for the Knee. This was undertaken at the prestigious Oxford Orthopaedic Engineering Centre and led to several presentations and publications on the biomechanics of ACL reconstructive surgery.

He successfully combined his medical training with a first class rugby career, playing for Bristol and Bath Rugby Clubs. He played 33 times for England, winning two Five Nations Grand Slams and reaching the Rugby World Cup Final in 1991.

In 1992 he was voted Rothmans Rugby Player of the Year. His sporting background gives him an invaluable insight into the pressures faced by top class sportsmen and women when they suffer injury. His empathy combined with the latest techniques in orthopaedic surgery for the knee has already helped treat National and International athletes from a variety of sports.

Qualifications

MBChB (Bristol) 1987
FRCS (London) 1991
FRCS(Orth) 1998

Affiliations

Mr Webb is a member of the British Association of Surgery for the Knee. He is also an active member of the British Orthopaedic Sports Trauma Association and the British Association of Sport and Exercise Medicine. He is an examiner for the Sport and Exercise Medicine Course held at Bath University.

Mr Webb provides the Orthopaedic Knee service for a number of local and regional sports teams including Bristol Rugby Club, Bristol City Football Club, Gloucestershire County Cricket Club, and Swansea City Football Club.

Research Interest and Publications

Mr Webb continues to conduct and publish research on current Orthopaedic practice. He has published in peer-reviewed journals and written chapters for standard Orthopaedic textbooks. Mr Webb has published the results of one of the largest series of patients undergoing ACL reconstruction using hamstring tendon grafts. He continues to conduct basic scientific research into new ways of advancing the techniques of ACL reconstruction. His interests also include; tendon healing and repair, cold compression as an adjunct to postoperative painkillers after knee surgery and injuries occurring during rugby.

He has presented his findings at local, National and International Orthopaedic Meetings.

Medico-legal Experience

Mr Webb does not undertake medico-legal expert witness work.

Peer Review Audit

Mr Webb is involved in the systematic and critical analysis of his own and his colleague's standards of medical care. He has designed and built a database to provide a real-time analysis of both his outpatient and operating experience.
